**PERSONAL
PROFILE:**

I am a highly dedicated, self-driven, and motivated individual, seeking challenges that test and motivate me. I have a diverse background in ICT. I am excellent at working with others to achieve a certain objective on time and with excellence. I enjoy meeting challenges and seeing them through while remaining good-humored under pressure and able to consider all options with an open, clear, and unprejudiced mind before making decisions.

**CAREER
OBJECTIVES:**

- To work hard in an environment where my skills and abilities are exploited and developed greatly.
- Develop my carrier by working in an institution that offers challenging positions and duties that will both effectively challenge and enable me to utilize and incorporate my experience and professional skills. This will enable me to contribute positively toward the achievement of the institution's goal and the advancement of my career.

SPECIAL SKILLS:

- Ability to work in any condition to deliver the best and always be above my challenges at all costs.
- I have a strong work ethic.
- Strong problem-solving and analytical skills.
- Self-motivated and a quick learner.
- I have the ability to grow and develop in the work environment hence enabling specialization in my field of profession.

AMBITIONS:

- To perfect both my business and information technology skills to thrive in my work environment.

**PERSONAL
INFORMATION:**

- Date of Birth: October 1, 1995.
- Marital Status: Single.

**EDUCATION &
PROFESSIONAL
TRAINING:**

Sept 2021 – Present

Kenya School of Revenue Administration.

Postgraduate Diploma In Tax Administration.

**June 2021 – April
2022**

Google Africa Developer Scholarship.

Google Associate Android Developer.

Link: [Associate Android Developer Certificate](#)

**Sept 2015 – June
2019**

Jomo Kenyatta University of Agriculture and Technology.

Bachelor of Business Information Technology.

Jan 2014 – Nov 2014

Ruiru Boys Secondary School.

Kenya Certificate of Secondary Education
(K.C.S.E).

SKILLS:

1. Strengths:

- **Android mobile Application Development:** Creating interactive Android-based mobile applications using Java or Kotlin programming languages with integration to Firebase tools for building high-quality mobile applications.
- **Frontend Development:** Creating and maintaining adaptable and responsive user-friendly static and dynamic websites and applications using HTML/CSS, and JavaScript and working with various content management systems.

2. Fundamental knowledge base:

- **Backend Development:** Creating effective core computational logic for dynamic websites and applications development by using PHP / SQL, Java, and Python Frameworks.

3. Other skills:

- **Tech Support Skills:** Setting up various computer hardware and offering training and support to staff for both software and hardware.
- **Networking:** Setting up network in an organization, troubleshooting, and diagnosis of the faulty network, computer systems, and printers.
